TO WHOM IT MAY CONCERN

'Gardens with Soul' has been using **BIOWISE** soil conditioner for all its landscaping work since 2002. The product is without a doubt the best quality soil conditioner on the market. With public awareness on recycling and other environmental issues, the use of waste products is not only environmentally responsible but the processing and composting of **BIOWISE** means the product is pathogen and weed free. Unlike other soil blends and conditioners it also has the most reliable consistency in quality of product. It is vital for landscapers to know that the soil they are planting out into is free from soil borne diseases such as die-back and pythium, and not infested with mites or other pests. Other problem associated with buying soil from unknown destinations is the importation of weed seeds. Composting kills viable weed seeds.

The team at **BIOWISE** have always been extremely helpful and accommodating when I have needed deliveries within 24 hours. The service I receive could not be faulted, deliveries are always on time and if any delays are encountered I receive a phone call to let me know when the delivery will be arriving. In landscaping the timing of deliveries ensures workers are not standing around for half a day waiting to start the next phase of the job.

I am extremely happy to recommend **BIOWISE** not only for it's very high quality soil conditioner and constancy, but the fantastic friendly and reliable service I receive when placing orders.

Yours sincerely

Sabrina Hahn
